intro\_

# Payment software solutions for any requirements.

Do you need terminal software for your POS? Payment protocols, gateways or terminal management systems? Consulting or certification assistance? We deliver software projects throughout the whole payment value chain, developing products for acquirers and processors, PSPs, network operators and merchants. 20 years of experience and over 500 successful projects make us one of the most reliable and innovative payment software

engineering companies worldwide. We combine the latest software technology with outstanding security know-how and expertise in all global payment standards (PCI, EMV, etc.). Our solutions solve complex problems and establish new standards within the entire payment industry.

offering\_

Current payment technologies.

Future payment technologies.

Leading security standards.

All acquirers, currencies and devices.

expertise areas\_

<div>Terminal software</div> <div>Multiprotocol software for any device (Mobile, POS, Vending).</div>	<div>Payment protocols</div> <div>Protocols such as Nexo, Apacs, GICC/ZVT, ISO8583, Ep2, EftPOS.</div>	<div>Payment gateways</div> <div>Protocol switching, protocol conversion.</div>	<div>Security and certifications</div> <div>Certifications such as EMV and PCI.</div>	<div>Mobile payment solutions</div> <div>mPOS QR-code based payment, Softpos, tap on phone.</div>

Our promise: We'll find an answer to any question and a solution to any challenge.

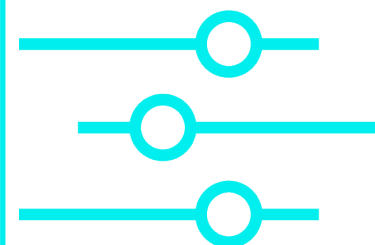

why choose abrantix software development\_

Technical competence and expertise handling highly sensitive data and high level security requirements.

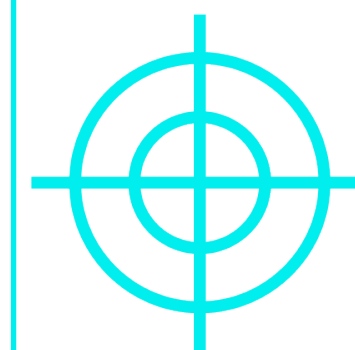

Ability to connect the complex requirements of a software solution with the business logic and needs of your company.

Qualitative, sustainable and fully customised solutions.

Reliability and partnership approach from two decades of work within the payment industry.

Project delivery on time and in full, exceeding goals and expectations.

what our clients think\_

**>> Abrantix has been our trusted engineering partner for two decades and a cutting-edge payments company. They are reliable, trustworthy and innovative, which is hard to find.**

**>> In terms of ep2 payment gateway implementation: Good people, good project, implemented on time. Our requirements have been fully met.**

why choose abranti**x**\_

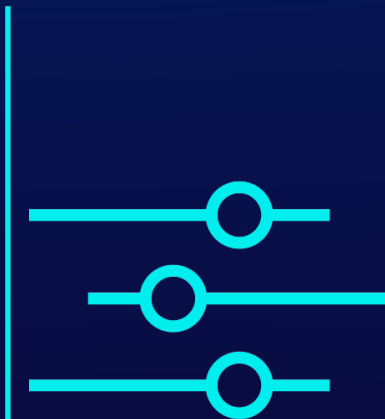

# We offer best- in-class payment technology.

We are experts in payment and reconciliation software as well as technology solutions for the whole payment industry. We work with the whole value chain, setting industry standards and leading paths for innovative payment technologies since 2001. So far we have successfully developed more than 500 projects and our technology is used in over 30 countries worldwide.

When it comes to financial transactions, we know what we are talking about. Developing new technologies and software is one thing. Doing this in line with payment industry security standards is another. We offer extensive expertise in payment software development, terminal test automation and leading payment reconciliation products with the necessary knowledge to ensure secure and frictionless financial transactions.

Swiss background with focus on quality, accuracy, security and innovation.

Customised service and product development.

Fully transparent and cooperative with clients to ensure their success.

Full advisory and support service with flexible working methodology.

High investment in R&D, enabling modern payment methods.
